

Grammar Mastery - Day 4

10 original questions | Reading and Writing

Complete the questions before turning to the answer explanations. Mark any guess, even if it turns out to be correct. For math, show your setup and check the requested quantity. For reading, identify the exact supporting detail; for grammar, identify the clause or subject.

These questions were authored for this workbook from the lesson topics. They are not official SAT questions or copies of the course's paid practice.

Answers & explanations

Count correct answers, but also review correct guesses. Redo missed questions after a day without looking at the solution.

1: A 2: B 3: C 4: B 5: B 6: C 7: B 8: C 9: B 10: B

Why each answer works

1. Answer: A. A paired dash closes the parenthetical phrase. The underlying clause is The machine’s design allowed it to operate.

2. Answer: B. Notes is plural; from the final rehearsal is a modifier.

3. Answer: C. The subject needs a finite predicate. Hoping to distinguish the two minerals is only a modifier.

4. Answer: B. The complete first clause introduces an explanation of the advantage. Use a colon.

5. Answer: B. The turbine was designed to withstand the currents, so it must be the subject following the modifier.

6. Answer: C. The densities belong to two minerals. Their is the plural possessive.

7. Answer: B. Semicolons separate complex list items containing internal commas.

8. Answer: C. Accumulation occurred before a later past event; use past perfect.

9. Answer: B. The independent clauses need a valid boundary: semicolon, then however followed by a comma.

10. Answer: B. An indirect question is embedded in a declarative sentence. End the sentence with a period.

For each missed or guessed question, record the skill, the condition you overlooked, and one specific action for next time.
