

Non-Desmos - Cumulative Test

33 bank questions | Suggested time: 50 minutes

This is a linked test booklet. Each question button opens the complete bank item, including its passage, equation, or diagram. The questions themselves are not reproduced inside this PDF. Record your responses below; use the bank's explanation after finishing.

Selection filter: SAT; medium and hard; Exclude active questions enabled when these items were selected on October 3, 2026. This filter protects practice-test questions. The website can change its classifications; recheck the exclusion filter before making any new selections.

Take the test

Open the numbered links in order. Do not open solutions while testing. Afterward, mark correct, incorrect, and guessed responses, and return to the matching lesson for errors. The time is a study target, not an official SAT module limit.

Skill map & review

Use this map only after the test. It identifies the topic for each item; it is not an answer key. The live bank provides the official response and explanation.

Label units and percent bases; use frequencies as weights; compare changes rather than levels; choose the conditioned population; distinguish sampling from assignment; match corresponding sides and dimensions before calculating.

No.	Question ID	Skill
1	5749ea7	Ratios, rates, proportional relationships, and units
2	4b2b655	Percentages
3	1ecfdab	One-variable data: Distributions and measures of center and spread
4	e06b79e	Two-variable data: Models and scatterplots
5	52c335e	Probability and conditional probability
6	19aaaa2a	Inference from sample statistics and margin of error
7	1ea09200	Evaluating statistical claims: Observational studies and experiments
8	2cc6e02	Area and volume
9	27c00a2	Lines, angles, and triangles
